

A single shovel width is not enough.

36" width is needed

Not everyone can use a narrow path.

People who use walkers, wheelchairs, baby strollers, rolling briefcases etc, all should have 36" wide sidewalks and curb ramps for safe travel, especially when the walks are slippery or wet.

A little extra effort makes it possible for everyone to use the public sidewalk and curb ramps in front of your home or business.

Montgomery County Law requires businesses and homeowners to shovel public sidewalks and curb ramps in front of their properties within 24 hours of a snowfall.

No one likes to be stuck
in the snow
Out in freezing cold
temperatures
And bone chilling wind.

Please consider that people
who use wheelchairs are
people just like You.

We want to get around in
the winter,
Working, shopping and
spending time with other
people.

We have better and more
productive things to do,
rather than hibernate.

So Save the Day – Shovel-
a-way!
